

- ### Objectives & Outcomes
- Cataloguing human values associated with Antarctica
 - Analysis of the nexus between values and the nature of human activity in Antarctica
 - Creation of a network of Antarctic social scientists and humanities researchers
 - Meta-database of relevant publications & projects
 - Awareness of the diversity of values
 - Better understanding of the main influences on human decision-making regarding polar issues
 - Initiation and strengthening of collaboration among researchers
 - Awareness of social and human science projects

Key Members

Anthropology	Juan Francisco Salazar
Arts and Humanities	Elizabeth Leane
Conservation Law	Kees Bastmeijer
Economics	Bernard Herber
Environmental Management	Alan Hemmings
Environmental Policy	Machiel Lamers
Geopolitics	Sanjay Chaturvedi
Governance & Science Policy	Paul Berkman
Human Geography	Emma Stewart
Psychology	Gary Steel
Tourism/Policy	Daniela Liggett

Planned activities

Interdisciplinary workshop

"Exploring linkages between environmental management and value systems – the case of Antarctica"

at the upcoming 25th International Congress for Conservation Biology (5th Dec. 2011)

“Bi-polar” collaboration

- Collaborative projects addressing cross-cutting issues
- Research exchanges
- Joint meetings and workshops

=> Tools:

- listservs
- regular communication
- joint websites/databases?
