

Antarctic Science in the Twenty-First Century.

Explore the southern continent
and its links to
the rest of the globe at the

2nd SCAR Open Science Conference

Hobart Australia
July 12th - 14th 2006

<http://www.scarcomnap2006.org/scarosc.php>

Scientific Committee on Antarctic Research (SCAR)

2nd Open Science Conference

on

"Antarctica in the Earth System"

If you've ever wanted to participate in Antarctic Science, now is the time to do it!

An international, interdisciplinary meeting covering all aspects of Antarctic research, particularly those addressing the close couplings between Antarctic processes and other parts of the Earth System.

For more information
and submission of abstracts:

<http://www.scarcomnap2006.org/scarosc.php>

Last day for submission of abstracts
December 31st 2005

Topics of interest include (but are not restricted to):

- present and future Antarctic climate and links to the rest of the globe
- palaeo-climate of the Antarctic and Southern Ocean
- molecular and genetic biology of Antarctic ecosystems
- biodiversity of the Southern Ocean
- evolution of the Antarctic continent and its role in global systems
- sun-earth interactions in polar regions
- subglacial hydrological processes and ice-bedrock processes
- Southern Ocean biogeochemistry and its response to climate change
- data systems for the International Polar Year
- history of Antarctic Research.
