Agenda Item: 2.3.1

Person Responsible: L. Newman

**EXCOM 2015**

**Tromsø, Norway 27-28 August 2015**

**THE SOUTHERN OCEAN OBSERVING SYSTEM  
(SOOS; [www.soos.aq](http://www.soos.aq))  
July 2014 – July 2015**

## Executive Summary

**Title:** The Southern Ocean Observing System (SOOS)

**Authors:** Louise Newman, Oscar Schofield, Anna Wåhlin, Andrew Constable, Sebastiaan Swart

### Introduction/ Background:

The Southern Ocean Observing System (SOOS) is a joint initiative of the Scientific Committee on Antarctic Research (SCAR) and the Scientific Committee on Oceanic Research (SCOR), and endorsed by the Partnership for Observations of the Global Ocean (POGO) and the Climate Variability and Predictability (CLIVAR) and Climate and Cryosphere (CliC) projects of the World Climate Research Programme. SOOS was launched in 2011 with the mission to facilitate the collection and delivery of essential observations on dynamics and change of Southern Ocean systems to all international stakeholders, through design, advocacy, and implementation of cost-effective observing and data delivery systems.

### Important Issues or Factors:

- 1) SOOS has drafted its 5-Year Strategic Plan
- 2) SOOS has produced its first official progress report – the SOOS 3-Year Progress Report (2012-2014) available in hardcopy or at <http://soos.aq/resources/reports?view=reports>
- 3) The governance structure of SOOS has grown to include three new categories of implementation bodies: Task Teams, Regional Working Groups, Capability Working Groups
- 4) SOOS held its 4<sup>th</sup> Scientific Steering Committee meeting, 3<sup>rd</sup> Data Management Sub-Committee meeting, and two strategic workshops a) The State of the Climate of the Southern Ocean, and b) Implementation of a Southern Ocean Observing System
- 5) SOOS has gained support through the Australian Research Council's Special Research Initiative for Antarctic Gateway Partnership (Project ID SR140300001) and has hired a Data Officer in May 2015 for 2 years

### Recommendations/Actions and Justification

SCAR provides financial support for the annual SSC meeting (2016 meeting hosted by Scripps Institution of Oceanography, USA). This support is imperative to ensure participation of all international SSC members. SOOS greatly appreciates the support provided by SCAR, and requests that this support is continued for 2016.

SOOS also requests the attendance of the SCAR Executive Director at the upcoming SOOS SSC meeting in the USA.

### Expected Benefits/Outcomes:

Continuation of the support for the SSC meeting will ensure participation by all SSC members, which is imperative for planning and implementation of SOOS objectives.

The SCAR Director has not yet attended a SOOS SSC meeting and with SOOS implementation bodies developing over the next year (Working Groups and Task Teams), it will be important to SCAR to have a solid understanding of what we are developing, to help avoid duplication and to help communication of what is going on in SOOS to the national committees and to the Antarctic Treaty.

### Partners:

SCOR provides 10,000 USD towards the annual SOOS SSC meeting. Discussions will be had with the 2016 SSC meeting host, regarding a level of host support for this meeting.

The SCOR Director has attended three of the four SOOS SSC meetings, and has confirmed his likely attendance at the 2016 meeting.

### Budget Implications:

10,000 USD are requested to support the 2015 SSC meeting

SCAR is asked to support the SCAR Director to attend out of the central SCAR budget, not the 10,000 USD requested for SSC participation.

## The Southern Ocean Observing System

### ***SOOS Activities and Milestones from July 2014 – July 2015***

#### **1) SOOS Strategic and Implementation Activities**

In 2014, SOOS clarified its mission and objectives, and developed new *Implementation Structures* to support implementation activities (e.g., Working Groups, Task Teams). This was articulated in the SOOS 5-year Strategic Plan, which is currently in internal review, and will soon be disseminated for external comments.

This plan restructured SOOS Objectives into a logical sequence of implementation. All Implementation Milestones will be reported herein against the newly defined Objectives.

#### ***Objective 1: DESIGN***

***Facilitate the design and implementation of a comprehensive and multi-disciplinary observing system for the Southern Ocean***

##### **Activities / Milestones**

###### **Physical Oceanographic Essential Ocean Variables Task Team**

OBJECTIVE: Develop a list of candidate EOVs for Southern Ocean physical oceanography

PRODUCT: A list of candidate EOVs for the Southern Ocean

###### **Ecosystem Essential Ocean Variables Task Team**

OBJECTIVE: Organise an international workshop on identification of ecosystem Essential Ocean Variables (eEOVs)

SPONSORS: ICSU, SCOR, Rutgers University

PRODUCT: Workshop on identification of eEOVs ([report](#)); Defined process for identification of eEOVs; SCOR Working Group proposal (unsuccessful); List of candidate eEOVs for the Southern Ocean

###### **Sea Ice EOVs Task Team**

OBJECTIVE: Develop a list of candidate EOVs for Southern Ocean sea ice

PRODUCT: A list of candidate sea-ice EOVs for the Southern Ocean

###### **Ocean-Ice EOVs Task Team**

OBJECTIVE: Develop a list of candidate EOVs for Southern Ocean Ocean-Ice interface

PRODUCT: A list of candidate ocean-ice EOVs for the Southern Ocean

#### ***Objective 2: CAPABILITIES***

***Advocate and guide the development of new observation technologies***

##### **Activities / Milestones**

- SOOS endorsed 5 successful international funding proposals that have a focus on advancing technological capabilities.
- SOOS is developing a new Endorsement Category, which will focus specifically on endorsement of ventures that support the development, testing and operation of new technologies.
- A SOOS Capability Working Group on facilitating observation technology development has been suggested and will be developed.
- Stemming directly from the 2014 SOOS SSC and FRISP meetings, Australia and Sweden will collaborate on the purchase, maintenance and use of Autonomous Underwater Vehicles (AUVs) for research under Antarctic ice shelves.

---

**Objective 3: FACILITATING OBSERVATIONS**

**Compile and encourage use of existing international standards and methodologies, and facilitate the development of new standards where required**

**Activities / Milestones**

- Support has been secured from SCOR for development of an online database of international standards and protocols.
- 

**Objective 4: REGIONAL IMPLEMENTATION**

**Unify and enhance current observation efforts and leverage further resources across disciplines, and between nations and programmes**

**Activities / Milestones**

SOOS has identified 3 implementation structures required to facilitate and drive activities against all objectives: Regional Working Groups, Capability Working Groups, and Task Teams

SOOS will be implemented regionally, the natural areas of focus by nations involved in Southern Ocean activities, although some activities will be coordinated at a circumpolar scale, such as Argo. SOOS is therefore developing *Regional Working Groups* that will coordinate and implement the observing system in their defined region, including facilitating improved readiness of particularly measurements and an ability to measure them where needed. Regional Working Group membership will be open, and will have representation from all nations working in the region, and expertise across all disciplines.

*Capability Working Groups* will be used to develop important capabilities for SOOS generally, including (i) developing and implementing technologies, (ii) improving observational design, efficiency and coverage, and (iii) developing methods for managing and disseminating information. The existing national and international projects and programs that contribute to SOOS will be identified and recognised as contributing regionally and/or to enhancing capabilities.

Task Teams are very short-term (weeks/months) groups developed with the purpose of producing a specific product or organizing an activity. Whilst the Working Group categories have only recently been defined and are not yet active, SOOS Task Teams have been active for nearly 2 years. Recent Task Team activities are listed below:

***Ross Sea Task Team***

**OBJECTIVE:** Identify current and planned activities and key observation gaps in the Ross Sea, to ensure that activities of nations new to the Ross Sea complement the international effort.

**PRODUCT:** "[Observations in the Ross Sea](#)" – SOOS Report Series, Issue 1.

***Air-Sea Fluxes Task Team***

**OBJECTIVE:** Organise a workshop that will bring together the Southern Ocean flux community, identify priorities, define EOVS, and develop a strategy for enhancing observations

**SPONSORS:** ESRIN, WCRP, SOOS, US-CLIVAR

**PRODUCT:** The SOOS [Air-Sea Flux Workshop](#), 21-23 September 2015, Frascati, Italy

***Joint SOOS-CliC-SCAR Southern Ocean Satellite Data Requirements Task Team***

**OBJECTIVE:** To develop a community report that articulates Southern Ocean satellite data requirements for inclusion in future mission planning.

**SPONSORS:** SOOS, CliC, SCAR

**PRODUCT:** A [report](#) of community needs for Southern Ocean Satellite Data

**National Capabilities Product**

**OBJECTIVE:** Central repository of information on National Capabilities for Southern Ocean nations, including routine shipping routes and routine operational or project-based observations.

**SPONSORS:** SCOR

**PRODUCT:** In development - National webpages for all Southern Ocean nations; A web-based map of national infrastructures and activities.

**Southern Ocean Field Activities Database**

**OBJECTIVE:** Database of existing and planned field activities,

**SPONSORS:** ARC Antarctic Gateway Partnership, NSF-CCHDO

**PRODUCT:** In development - Database of information on existing and planned (funded) national and programmatic field activities, visualised in a dynamic, web-based mapping tool.

**Objective 5: DATA DELIVERY**

**Facilitate linking of sustained long-term observations to provide a system of enhanced data discovery and delivery, utilising existing data centres and programmatic efforts combined with, as needed, purpose-built data management and storage systems.**

The SOOS data effort thus far has been limited by a lack of dedicated resources. In 2014, SOOS gained support through the Australian Research Council's Special Research Initiative for Antarctic Gateway Partnership (Project ID SR140300001) and has hired a Data Officer for 2 years. This will greatly enhance DMSC activities and capabilities towards achieving Objective 5.

**The SOOS Data Management Sub-Committee (DMSC)**

New members on the DMSC include Alicia Aleman (NASA GCMD), James Cusick (AAD, AU), Jenny Thomas (SONA, UK) and Joana Beja (BODC, UK).

**Activities / Milestones**

- SOOS has hired Dr Phillipa Bricher as the inaugural SOOS Data Officer.
- 3<sup>rd</sup> Annual SOOS DMSC meeting was held in Hobart, Australia (June 2015), hosted by IMAS-UTAS. Two open data activity days and a joint DMSC-SSC session were also held.
- The SOOS metadata portal (hosted by NASA GCMD) had stagnated due to a lack of resources to dedicate to its full development. A significant overhaul of the portal was carried out during the open data activity days by the DMSC. The search term that draws in metadata records on the GCMD to this portal was reworked to explicitly draw in any datasets that spatially overlap with the Southern Ocean and which are related to any of the candidate Essential Ocean Variables, so as to better target the portal on datasets of interest to SOOS's stakeholders. The group also identified key datasets and established processes for converting metadata records from other formats into GCMD's native DIF format. The metadata portal is available through <http://gcmd.nasa.gov/portals/soos/>
- In the immediate-term, SOOS is working with the following groups:
  - OceanSITES (<http://www.oceansites.org/>) to find a home for identified orphan mooring datasets and make it discoverable through the metadata portal.
  - The Swedish Polar Research Secretariat to make Bellingshausen, Amundsen and Ross Sea data discoverable through the SOOS metadata portal.
  - The Coastal Ocean Observation Lab at Rutgers University to make US glider data discoverable through the metadata portal
  - The University of Cape Town's Marine Research Institute to house South African glider data and make it discoverable through the metadata portal.

These groups represent the initial steps of a much wider program to make Southern Ocean data public and discoverable, using existing data repositories and the metadata portal

- A data policy has been adopted and will soon be available on the SOOS website
- An interim field-project planning tool has been designed to help researchers share details of upcoming voyages and deployments. Ultimately, this will have a web interface with a live web-map, but currently consists of a web-form that feeds data to a spreadsheet that will soon be publicly available.

---

### **Objective 6: SUPPORT ACTIVITIES**

***Provide services to communicate, coordinate, advocate and facilitate SOOS objectives and activities***

#### **Community and Advocacy Activities / Milestones**

- The importance of connecting with SOOS has been articulated in the strategic and implementation plans of 2 international programs (WMO Year of Polar Prediction, CLIVAR-CliC-SCAR Southern Ocean Region Panel), and 1 national observing effort (Australia's Integrated Marine Observing System).
- Australia and the USA submitted a joint working paper to the Committee for Environmental Protection (CEP) at the 2015 Antarctic Treaty meeting. Titled "Shared science priorities and cooperation: systematic observations and modelling in the Southern Ocean", this report highlighted the importance of international contributions to SOOS. CEP nations agreed unanimously on the importance of SOOS and supported all recommendations from the paper.
- SOOS has 40 Affiliated Institutes, Organisations, Programmes and Field Initiatives across 16 nations.
- Since March 2014, SOOS has endorsed 18 individual research projects.

#### **Communication Activities / Milestones**

- The SOOS website ([www.soos.aq](http://www.soos.aq)) was maintained, however needs updating, which will take place in late 2015.
- Two issues of the online SOOS newsletter were produced and disseminated [www.soos.aq/index.php/resources/newsletters?view=newsletters](http://www.soos.aq/index.php/resources/newsletters?view=newsletters)
- SOOS has developed an online Report Series for all grey literature and reports. These reports are published through the SOOS Collection on Zenodo (<https://zenodo.org/>)
- Between March 2014 – April 2015, SOOS was represented or presented at 26 international conferences, and has provided reports to the Antarctic Treaty and SCOR.
- SOOS has Twitter and Facebook accounts, providing updates to over 1000 people, across 45 countries.
- SOOS Town hall at SCAR OSM (New Zealand, August 2014) to enhance understanding and knowledge of the status of ecosystem Essential Ocean Variable activities for the Southern Ocean
- SOOS Scientific Session at SCAR OSM (New Zealand, August 2014) to support SOOS-relevant science, build community, and highlight the breadth of SOOS science.
- SOOS International Workshop "Implementation of a Southern Ocean Observing System" (11-12<sup>th</sup> June 2015, IMAS-UTas, Australia) attended by 70 international participants
- SOOS International Workshop "Assessing the State of the Climate of the Southern Ocean" (10<sup>th</sup> June 2015, IMAS-UTas, Australia) attended by 60 international participants

#### **Publications and Reports Activities/Milestones**

- Newman, L., et al., (2015). [SOOS 3-Year Progress Report](#). Zenodo, in press
- Constable, A., et al., (2015). Report on 2015 Activities of the Southern Ocean Observing System relevant to the work of CCAMLR. Zenodo, in press

### **Governance and Management Activities / Milestones**

- From an international call for nominations, SOOS appointed four new members for the 2015 Scientific Steering Committee: Matthew Mazloff (SIO, USA), Mike Williams (NIWA, NZ), Jean-Baptiste Sallee (LOCEAN, FR), SangHoon Lee (KOPRI, Korea). Two SSC members rotated off the committee in 2014: Bronte Tilbrook (CSIRO, AU), Steve Rintoul (CSIRO, AU).
- Maciej Telszewski became the IOCCP ex-officio on the SOOS SSC
- Giorgio Budillon became the Italian National Representative for SOOS
- Takeshi Tamura became the Japanese National Representative for SOOS
- 4<sup>th</sup> SOOS Scientific Steering Committee Meeting (Australia, June 2015), hosted by the Institute for Marine and Antarctic Studies, University of Tasmania.

### **Sponsorship and Endorsement Activities / Milestones**

- SCAR and SCOR both continued their support of the annual SOOS SSC meeting (2014 and 2015)
- IMAS-UTas continued to host the SOOS IPO and will do so until Aug 2016.
- The Australian Research Council's Special Research Initiative for Antarctic Gateway Partnership (Project ID SR140300001) sponsored the SOOS IPO with 100,000 AUD over 3 years towards supporting new SOOS initiatives, and a further 300,000 AUD over 3 years to support the salary of the SOOS Data Officer (2015- Aug 2016), and then the SOOS Executive Officer (Aug 2016 – Aug 2017) when the existing IMAS hosting contract finishes.
- The Australian Antarctic Division continued to provide financial support to the SOOS IPO for both the 2014-2015 and 2015-2016 financial years.
- The Australian Integrated Marine Observing System (IMOS) continued their in-kind support of the SOOS IPO in 2014 and onwards into 2015. This support was extended to include support of Finance and Administration duties for the SOOS IPO.
- New Zealand Antarctic Research Institute (NZARI) provide support for SOOS in 2015 through sponsorship of NZ SSC Member Mike Williams to attend SOOS activities.
- Antarctica New Zealand have sponsored SOOS since 2012. ANZ and SOOS are in the process of developing an official MoU to better articulate and define ANZ sponsorship and involvement in SOOS for 2015 onwards.
- The Tasmania Partnership for Advanced Computing (TPAC) continued their in-kind sponsorship of SOOS by providing web-programming support.
- NSF-CCHDO are new sponsors in 2014, through their in-kind support of 1-month web-programming activities per year.
- The University of Gothenburg, Sweden, are also new sponsors for 2014/2015, through their in-kind support of Anna Wåhlin's (SOOS Co-Chair) involvement in SOOS and provision of computer hardware for the IPO.

*SOOS thanks all of its sponsors for their support over the last few years, and for their continued assistance into 2015.*

### **SOOS Planned Activities for April 2015 - onwards**

Implementation activities in 2015-2016 will focus on achieving the objectives and deliverables outlined in the interim SOOS 5-year Strategic Plan.

Specific activities already planned for this period are listed below:

- International review, finalisation and publishing of the SOOS 5-year Strategic Plan

- Submission of the SOOS Community Report on Satellite Data Requirements
- Air-Sea Flux Workshop (21-23 September, Frascati, Italy), sponsored by ESA, WCRP-CLIVAR and SOOS
- Development and delivery of online Southern Ocean portal of existing and planned field activities of relevance to SOOS
- Release of SOOS Metadata Portal and regular population with new records.
- Update of SOOS website
- Development of Regional and Capability Working Groups
- Solidification of long-term funding of the SOOS Executive Officer salary
